

Projects at DMI supported by the European Commission

Contents

| | |
|---|----|
| Introduction | 1 |
| Stratospheric Ozone Layer | |
| Stratospheric Climatology using UV-visible Spectroscopy - 3 (SCUVS - 3) | 5 |
| Ozone Soundings as a Tool for Detecting Ozone Change (OSDOC) | 7 |
| Third European Stratospheric Experiment on Ozone : A Lagrangian Experiment in the Arctic Polar Vortex (LAGRANGIAN EXPERIMENT) | 9 |
| Multi-Instrument Investigation of Polar Stratospheric Cloud Formation and Heterogeneous Chemistry (PSCs)..... | 11 |
| In-situ Analysis of Aerosols and Gases in the Polar Stratosphere: A Contribution to the THESEO Campaign (PSC-analysis)..... | 13 |
| Modelling of the Impact on Ozone and other Chemical Compounds in the Atmosphere from Aeroplane Emissions (AEROCHEM-II)..... | 15 |
| Towards the Prediction of Stratospheric Ozone (TOPOZ) ¹ Stratospheric Aerosols and Ozone in the Northern and Southern Hemisphere (SAONAS) ² | 17 |
| European Stratospheric Monitoring Stations in the Arctic (ESMOS/Arctic II)..... | 19 |
| Ultraviolet Radiation in the Arctic; Past, Present and Future (UVRAPPF) | 22 |
| Climate Variations and Climate Changes | |
| Interannual and Decadal Climate Variability: Scale Interaction Experiments (SINTEX)..... | 24 |
| Atmospheric Circulation Classification and Downscaling (ACCORD)..... | 27 |
| Short Term Climate Variability | 29 |
| Impact of Storms on Waves and Surges: Changing Climate in the Past 100 Years and Perspectives for the Future (WASA) | 31 |
| Annual to Decadal Variability in Climate in Europe (ADVICE) | 33 |
| Numerical Simulation and Analysis of Climate Variability on Decadal and Centennial Time Scales (MILLENNIA) | 35 |
| Regional Storm Wave and Surge Scenarios for the 2100 Century (STOWASUS-2100)..... | 37 |
| Project On Tendency Evaluations Using New Techniques to Improve Atmospheric Long Term Simulations (POTENTIALS) | 39 |
| Numerical Studies of the Energy and Water Cycle of the Baltic Region (NEWBALTIC) | 41 |
| Numerical Studies of the Energy and Water Cycle of the Baltic Region (NEWBALTIC II)..... | 44 |

| | |
|--|----|
| The Role of Ozone in the Climate System (ROCS) | 46 |
| A European Programme on Prediction of Climate Variations on Seasonal and Interannual Timescales (PROVOST) | 49 |
| Land-Surface Processes and Climate Response | 51 |
| Tundra Degradation in the Russian Arctic (TUNDRA) | 53 |
| Modelling European Regional Climate: Understanding and Reducing Errors (MERCURE)..... | 55 |
| An Enhanced Resolution Modelling Study on Anthropogenic Climate Change (ERACC)..... | 57 |
| Remote Sensing | |
| Climate and Environment Monitoring with GPS Atmospheric Profiling (CLIMAP)..... | 60 |
| Meteorological Applications of GPS Integrated Column Water Vapor Measurement in the Western Mediterranean (MAGIC) | 64 |
| Operational Sea Ice Monitoring by Satellites in Europe (OSIMS)..... | 66 |
| Integrated Use of New Microwave Satellite Data for Improved Sea Ice Observation (IMSI) | 68 |
| Marine Science and Technology | |
| European Sub Polar Research Programme Phase 2: The Thermohaline Circulation in the Greenland Sea (ESOP-2) | 72 |
| Transport | |
| Air/Ground Exchange of Weather Data..... | 76 |
| Energy Programme | |
| Implementing Short-Term Prediction at Utilities | 78 |
| Nuclear Fission Safety | |
| Real-time Online Decision Support (RODOS) for nuclear emergencies | 81 |
| Real-time long-range atmospheric models inter-comparison (RTMOD)..... | 83 |
| Other programmes | |
| High Performance Rainfall Radar Image Processing for Sewage System Control (RADAR)..... | 85 |
