## Abstract

A number of climatological data series are published in this report. These are monthly-/annual values for 1991-2018 and decadal averages for the periods 1991-2000 and 2001-2010 plus 30 years “clino” averages for the periods 1971-2000 and 1981-2010 for 5 locations in Denmark, 1 at the Faroe Islands and 9 in Greenland and for parameters air temperature, sea level atmospheric air pressure and precipitation. The data series is a part of the continuous data contribution to “World Weather Records/WWR” as regards Denmark, The Faroe Islands and Greenland.

## Resumé

Nærværende rapport præsenterer en række danske klimaserier. Det inkluderer måneds-/årsværdier for 1991-2018 og dekadegennemsnit for perioderne 1991-2000 og 2001-2010 samt 30 års ”clino” gennemsnit for perioderne 1971-2000 and 1981-2010 for 5 danske, 1 færøsk og 9 grønlandske lokaliteter og for parametrene lufttemperatur, lufttryk ved havets overflade og nedbør. Data serierne er en del af det løbende bidrag til ”World Weather Records/WWR”, hvad angår Danmark, Færøerne og Grønland.

## 1. Introduction

This report presents a number of climatological data series. These are monthly-/annual values for 1991-2018 and decadal averages for the periods 1991-2000 and 2001-2010 plus 30 years “clino” averages for the periods 1971-2000 and 1981-2010 for 5 locations in Denmark, 1 at The Faroe Islands and 9 in Greenland based on DMI Monthly Climate Data Collections [5], [6] and [7]. The data parameters include average air temperature, average of minimum and maximum air temperature, average atmospheric air pressure at mean sea level (msl) and accumulated precipitation.

The data series is a part of the continuous data contribution to “World Weather Records/WWR” [8] as regards Denmark, The Faroe Islands and Greenland.

World Weather Records (WWR) is an archived publication and digital data set. The World Meteorological Organization (WMO) is the current project leader for the WWR. WWR is meteorological data from locations around the world. Through most of its history, WWR has been a publication, first published in 1927. Data includes monthly mean values of pressure, temperature, precipitation, and where available, station metadata notes documenting observation practices and station configurations.

In recent years, data were supplied by National Meteorological Services of various countries, many of which became members of the World Meteorological Organization (WMO). The First Issue included data from earliest records available at that time up to 1920. Data have been collected for periods 1921-30 (2nd Series), 1931-40 (3rd Series), 1941-50 (4th Series), 1951-60 (5th Series), 1961-70 (6th Series), 1971-80 (7th Series), 1981-90 (8th Series), 1991-2000 (9th Series), and 2001-2011 (10th Series).

The most recent Series 11 continues, insofar as possible, the record of monthly mean values of station pressure, sea-level pressure, temperature, and monthly total precipitation for stations listed in previous volumes. In addition to these parameters, mean monthly maximum and minimum temperatures have been collected for many stations and are archived in digital files by National Centers for Environmental Information (NCEI). New stations have also been included. In contrast to previous series, the 11th Series is available for the partial decade, so as to limit waiting period for new records. It begins in 2010 and is updated yearly, extending into the entire decade.

This DMI report (pdf-format) and the matching data set can be downloaded from the publication part of DMI web pages ([www.dmi.dk](http://www.dmi.dk)).

See also the following recently published DMI reports:

[2] DMI Report presenting decadal climate summary 1901-2010 for the same stations in Denmark, The Faroe Islands and Greenland (minus Pituffik and Qaqortoq) as presented in this report, based on DMI Monthly Climate Data Collection. The parameters included here are average air temperature, highest and lowest air temperature and highest 24 hour accumulated precipitation. For the same stations also air temperature rankings 2001-2010 are presented. This decadal climate summary and the air temperature ranking was a contribution to the WMO report “Decadal Global Climate Summary/DGCS 2001-2010” as regards Denmark, The Faroe Islands and Greenland.

[3] DMI Report presenting World Weather Records 1991-2010. Specifically monthly-/annual values for 1991-2010 and decadal averages for the periods 1991-2000 and 2001-2010 plus 30 years “clino” averages for the periods 1971-2000 and 1981-2010 for the same stations in Denmark, The Faroe Islands and Greenland as presented in this report, based on DMI Monthly Climate Data Collection. The data parameters include average air temperature, average of minimum and maximum air temperature, average atmospheric air pressure at mean sea level (msl) and accumulated precipitation.

[4] DMI Report presenting World Weather Records 1991-2017. Specifically monthly-/annual values for 1991-2017 and decadal averages for the periods 1991-2000 and 2001-2010 plus 30 years “clino” averages for the periods 1971-2000 and 1981-2010 for the same stations in Denmark, The Faroe Islands and Greenland as presented in this report, based on DMI Monthly Climate Data Collection. The data parameters include average air temperature, average of minimum and maximum air temperature, average atmospheric air pressure at mean sea level (msl) and accumulated precipitation.

## 2. Data overview

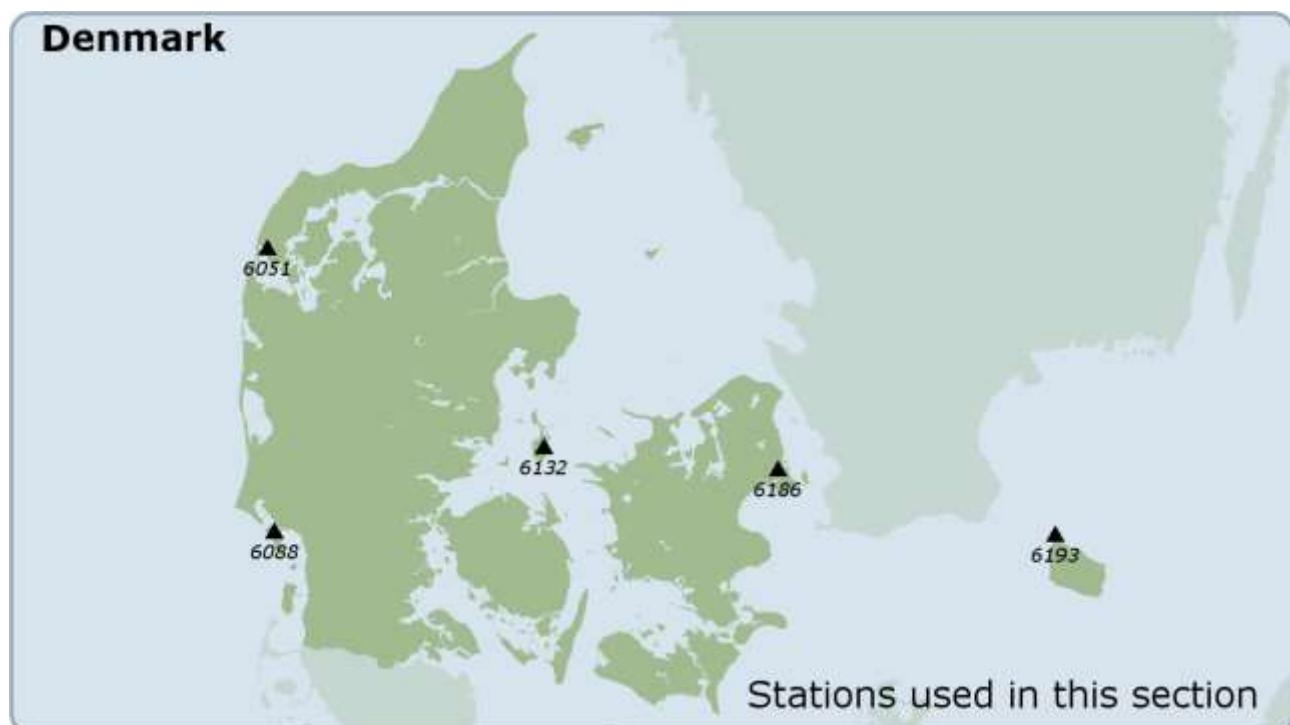

### 2.1 Station Overview

Country	Station number	Station	Latitude	Longitude	Stat height (above msl)	Bar height (above msl)
DK	06051	Vestervig (air pressure from 6052)	5646N	0819E	18	3,6
DK	06088	Nordby (air pressure 6080, 6081 and 6096*)	5527N	0824E	4	8,9*
DK	06132	Tranebjerg (air pressure from 6159)	5550N	1037E	16	15,8
DK	06186	Landbohøjskolen (Kbh) (air pressure 6180)	5541N	1233E	7	5,0
DK	06193	Hammer Odde Fyr	5518N	1446E	8	9,4
FR	06011	Tórshavn	6201N	0646W	54	55,9
GR	04202	Pituffik (air temperature and precipitation)	7632N	6842W	77	
GR	04211	Upernivik	7247N	5608W	126	130,0
GR	04221	Ilulissat	6914N	5104W	29	33,6
GR	04250	Nuuk	6411N	5144W	80	83,7
GR	04270	Narsarsuaq	6110N	4526W	34	31,0
GR	04272	Qaqortoq (air temperature and precipitation)	6043N	4603W	57	
GR	04320	Danmarkshavn	7646N	1840W	11	12,0
GR	04339	Ittoqqortoormiit	7029N	2157W	70	71,5
GR	04360	Tasiilaq	6537N	3738W	54	55,9

\* The atmospheric air pressure for the period 1987/7 - 2018 is an average of 06080, 06081 and 06096. The latitude, longitude, station height is the figures for 6088 Nordby. The barometer height is from 06096 Rømø/Juvre.

**Table 2.1. Primary stations used in this report. See maps below for the locations. The maps are from [5], [6] and [7], where the source of the “World Weather Records” datasets are published as long monthly time series.**

Please notice that 34262 Ivittuut is included in the Greenland map, despite it is not a part of this report. The average monthly air temperature series from 34262 Ivittuut is adjusted to Narsarsuaq series in the data set [6] and can be used as a joined long time series. 34339 Scoresbysund, located the same place as 4339 Ittoqqortoormiit and therefore not shown on the map, is also not a part of this report, but part of [6]. It is not adjusted to 4339! More details can be seen in [5,6,7] and in section 3 - Station History.

## The Faroe Islands

Stations used in this section

## Greenland

Stations used in this report

## 2.2 Data Dictionary

DMI No	WWR No	Element/Parameter	Unit
101	4	Average air temperature	0,1°C
111	6	Average daily maximum air temperature	0,1°C
121	7	Average daily minimum air temperature	0,1°C
401	3	Average atmospheric air pressure at mean sea level (msl)	0,1 hPa
601	5	Accumulated precipitation	0,1 mm

**Table 2.2. Elements/parameters presented in this report.**

### 3. Station History

By convention a time series is named after the most recent primary station delivering the data. Below is presented an overview back in time of the positions and relocations and starting and (if any) closing dates of the long station time series, which forms the backbone of the data sets included in this report [5], [6] and [7]. Also presented in the tables are any positions or relocations and starting and closing dates of other stations forming part of the series and therefore referred to in the description of the data series. More metadata on the series/stations may be found in [1,5,6,7].

**Table 3. Station history from [5], [6] and [7]. The most recent primary stations are grey shaded. First year of data appearance is included for every station.**

## 6186 Københavns Landbohøjskole from 1768

This station has been subject to urban change. Back in time the surroundings were rural whereas today the park of Landbohøjskolen with the synoptic station is surrounded by the city of Copenhagen. Observations in Copenhagen started 1751 in the tower "Rundetårn", but the first 16 years the thermometer was situated inside a room in a little observatory near the top of the tower. In the beginning of 1767 the thermometer was situated outside the observatory facing north and from 1768 the observations were taken 4 times a day. Therefore the series presented in this report starts 1768.

\*) From Nov 2006 the monthly data are obtained from Thule AB (Pituffik), personal communication.

### 4211 Mittarfik Upernivik (Greenland; Airport) from 1873

The station 4209 Upernivik AWS was an automatic station, which explains the lack of manually observations in the period, where 4210 Upernivik was closed.

### 4250 Nuuk (Greenland) (Danish name: Godthåb) from 1784

In the late 1990's the manual precipitation gauge at 4250 Nuuk was replaced with an automatic rain gauge. This arrangement did not function satisfactorily for climatic purposes at that time and therefore supplementary manual precipitation measurements were started 2 February 1999 at station 34250 Nuuk. Here the precipitation was observed every day at 21 UTC for the previous 24

hours. The manual station 34250 was closed 1 September 2012.

## 4. Data files

Data are included in this report as three (3) Excel files, one for each of the countries Denmark, The Faroe Islands and Greenland and with fifteen (15) sheets, one for every station in table 2.1:  
**dk\_wwr\_1991\_2018.xlsx, fr\_wwr\_1991\_2018.xlsx, gr\_wwr\_1991\_2018.xlsx**

The format is:

Station Metadata section:

Field 1:	Blank	
Field 2:	WMO number	
Field 3:	Record type	1= Station Metadata Record
Field 4:	Latitude	N= Northern
Field 5:	Longitude	E= Eastern, W= Western
Field 6:	Country	
Field 7:	Station name	
Field 8:	Height of station above sea level (meters)	
Field 9:	Height of barometer above sea level (0.1 meters)	

Data records:

Field 1:	Blank	
Field 2:	WMO number	
Field 3:	Element code	3= Average atmospheric air pressure (msl) in 0.1 hPa 4= Average air temperature in 0.1°C 5= Accumulated precipitation in 0.1 mm 6= Average maximum air temperature in 0,1°C 7= Average minimum air temperature in 0,1°C
Field 4:	Year	
Field 5:	Rec type	blank=Monthly and Annual data 1=Decadal (1991- 2000 or 2001-2010) average (NB! Year = 2000 or 2010) 2=Clino (1971-2000 or 1981-2010) average (NB! Year = 2000 or 2010)
Field 6:	Jan	Value for January
Field 7:	Feb	Value for February
Field 8:	Mar	Value for March
Field 9:	Apr	Value for April
Field 10:	May	Value for May
Field 11:	Jun	Value for June
Field 12:	Jul	Value for July
Field 13:	Aug	Value for August
Field 14:	Sep	Value for September
Field 15:	Oct	Value for October
Field 16:	Nov	Value for November
Field 17:	Dec	Value for December
Field 18:	Annual	Annual value

Note: If a monthly value is missing, the yearly value is not calculated. The corresponding fields are left blank. Please also notice that:

- 1) 4202 Pituffik and 4272 Qaqortoq only have average air temperatures and accumulated precipitation in the dataset.
- 2) 4211 Upernivik only have accumulated precipitation up to 1980. The clino 1971-2000 for accumulated precipitation are therefore only calculated on data 1971-1980!
- 3) 4221 Ilulissat only have accumulated precipitation up to 1984. The clino 1971-2000 for accumulated precipitation are therefore only calculated on data 1971-1984! The clino 1981-2010 for accumulated precipitation are therefore only calculated on data 1981-1984!
